Water Polo Teams - We've Got Numbers!

Water Polo is a game of numbers--cap numbers, shot clocks, game clocks, exclusion clocks, periods, team scores, individual points, exclusion minutes, and the list goes on! You can run a match with a table full of people pushing pencils, or you can use IST's POLOWARE System and let the computer do the work.

IST's modular system means you only buy what you can afford now, then add components as funds become available. Versatility is the key--use a computer you already have. Shot and game clocks can be used as pace clocks.

System Components

POLOWARE Software Turns your IBM-Compatible PC into a water polo game console. Maintains team rosters with class and cap number. Set up matches, and players from selected teams are automatically entered. Runs and displays game, shot and eject clocks. Keeps team scores, records points by player, tracks up to 4 ejects at once. Prints match history.

SHOTCLOCK Place a 2-digit shot clock at each goal, linked to the PC running POLOWARE Software, and your players will have Super-Bright LED display that's easy to read indoors or out. Or use a Programming Pendant for manual shot clock operation. When not used for water polo, it becomes a continuous counting pace clock for swim training.

SWIMCOUNT Game Clock Link a 4-digit SWIMCOUNT (or other clock from IST's pace clock family) to the POLOWARE PC and you have an on-deck game clock display, also with Super-Bright LED digits. Use as a continuous counting pace clock for swim training. Available with or without battery.

SWIMWARE Scoreboards For the ultimate display of game information, add a 6, 8 or 10 lane SWIMWARE Scoreboard with scrolling message line. Displays game, shot and eject clocks, quarter, team score, name and cap number of last player to score. Use the message line to sell ads during the match. POLOWARE is also compatible with other vendors' scoreboards.
