Water Polo Teams— We've Got Numbers!

Water Polo is a game of numbers—cap numbers, shot clocks, game clocks, exclusion clocks, periods, team scores, individual points, goalie saves, exclusion minutes, and the list goes on! You can run a match with a table full of people pushing pencils, or you can use IST's POLOWARE System and let your laptop do the work.

IST's modular system means you only buy what you can afford to, then add components as funds become available. Versatility is the key—use a laptop you already have. Link clocks with wires or wireless. Shot and game clocks an be used as pace clocks.
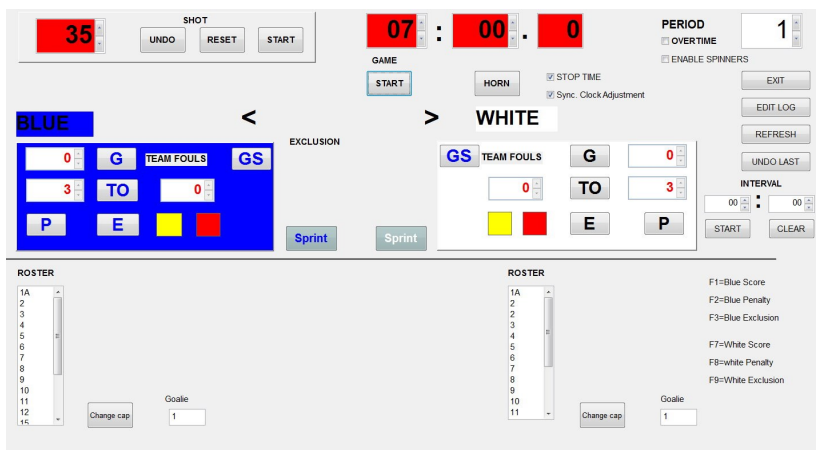

System Components

POLOWARE3 Software turns your laptop into a water polo match console. Maintains team rosters with class and cap number. Set up a match and athletes from the selected teams are automatically entered. Runs and displays the game, shot and eject clocks. Keeps team scores; records points and saves by player; and tracks up to 4 exclusions at once. When the match is over, print a complete match history.

SHOTCLOCK Place a 2-digit SHOTCLOCK at each goal, linked to the laptop running POLOWARE3 Software, and your players will have a Super-Bright LED display that's easy to read indoors or out. When not in use for water polo, it becomes a continuous counting pace clock for swim training. Available with or without battery.

SWIMCOUNT Game Clock Link this (or any other 4-digit IST clock) to the laptop and you have an on-deck game clock display—also with Super-Bright LED digits. Use as a continuous counting pace clock for swim training. Available with or without battery.

SWIMWARE Scoreboards Available scoreboards include a 4' period/score display, an 8' game clock/period/score display or a SWIMWARE 6-10 lane alphanumeric scoreboard that shows game, shot and exclusion clocks; period; team scores, and name/cap number of last player to score. Use the clocks and scoreboards for swimming, too!
