- Conformal coated electronics

Environmental

- Operating range: 0° to +55°C
- Storage range: -55° to +85°C
- Operating humidity <=90% non-condensing

IST's SWIMWARE Numeric Scoreboards are driven by TIMEWARE for Windows Swimming and Diving Software. During swimming events, numeric boards display a running clock on Lane 1, and cumulative splits on the remaining lanes (Lane 1 split is displayed briefly, then the running clock continues). As a lane finishes the race, the Lane, Place and Time are displayed.

During diving events, the board displays the diver's rotation number and current score, the score for that dive and the new total score.

With POLOWARE for Windows Water Polo Software, the board displays the period, shot clock, exclusion clock, and home and guest scores.

Use WORKWARE for Windows to run a different workout clock on each line of the scoreboard.

A scrolling alphanumeric message line can be added to expand the uses for the board. Numeric Scoreboards can easily be upgraded to a full alphanumeric display. Customize your board with team or sponsor logo panels which can be added for an extra charge. Like all IST products, the SWIMWARE Numeric Scoreboards are covered by a 5 year warranty.
