

TIMEWARE® 3

TIMEWARE® 3 Software turns your laptop into a timing console. Create your own event lists; set up a meet by name and date; time and place events with one or more heats; score and place diving; print out event results, meet results and team splits; and store all the data in a virtually unlimited memory. Demo mode makes training simple. Add IST's SWIMSTART, a deck cable and backup buttons and have a "semiautomatic" timing system for an affordable price. It's perfect for summer leagues and small teams. Expand your system with touchpads and scoreboard as more funds become available. **TIMEWARE® 3** is compatible with existing starts, touchpads and many numeric scoreboards.

The screenshot shows the 'Basic Timing Mode' interface for a swimming event. The main table displays results for 8 lanes. The event is '8J F GIRL'S 200 IM' at 'HINSDALE CENT'. The clock shows 1:48. The timing status is 'AUTO START' and the heat is 'READY'. A 'TOUCHPAD SIMULATOR NEAR END' window is open, showing 'Primary' and 'Backup' start buttons for lanes 1-8. The simulator window has '2' selected for lane 2. The interface includes various control buttons and a legend for lane status indicators.
