

IST Touchpad Bracket Selector

From the drawings below, select the gutter shape that most closely matches your pool. Fill in the height and width measurements and draw in the water level. Fax (616/247-0086) or email (info@istime.com) the completed drawing to IST so we can customize your touchpad brackets to fit your pool.

Add any notes you feel might be helpful below. Be sure to include angle measurements if required. If your gutter does not match any of these designs, please send us your own drawing with as much detail as possible, including all measurements and angles.

Please note on the drawing if your pool wall is not completely flush behind the pads. If the wall is indented below the gutter, indicate the depth of the indentation. IST can provide spacers on the back of the pad to support them.
