

BOARDWARE^{®3}

BOARDWARE^{®3} Software turns your laptop into an alphanumeric scoreboard that can be projected on your pool wall. Running on the same computer with IST's MEETWARE, TIMEWARE, POLOWARE or WORKWARE, **BOARDWARE^{®3}** gives you an easy-to-read display with 32 characters per lane line and a scrolling header line. Image colors and logos can be customized for your team. When not used for timing, **BOARDWARE^{®3}** can display text messages, or minimize the program and project any other image you can display on a computer screen. Do PowerPoint presentations for Senior Night or show training videos to your team. Imagine a midnight pool party watching "Jaws" on a 16 foot wide screen!

BOARDWARE^{®3} is recommended for pools with minimal or no natural light. It requires a computer with Windows XP or higher and an external monitor port, a projector with sufficient lumen rating to show a bright image at the desired location, and a theater style screen surface for the best display. These items are not provided by IST, but your local AV provider can help you find the equipment that meets your needs.
